(54) **EXTRACT OF GROWTH PROMOTING AGENT**

(57) Abstract:

**PROBLEM TO BE SOLVED:** To obtain an extract of a growth promoting agent capable of improving a soil, preventing disease and a pest, exterminating the pest and promoting the growth of a crop.

**SOLUTION:** An extract of Katsuwonus pelamis, dried bonito, fish, a shell, bone dust, a soy sauce cake, a crab, powder of ore of fine ceramics (capable of radiating far-infrared), seawater or common salt, a

~~Seaweed~~ an onion, a citrus fruit, Allium sativum, cayenne pepper, coffee, tea and molasses are added to a boiling water, and the mixture is concentrated. The concentrated mixture is subjected to straining by a straining tool, and cooled. The cooled mixture is mixed with an extract of lees of Shochu (Japanese white distilled liquor), the Shochu, vinegar, a spreader and a synthetic detergent. The obtained mixture is diluted with water and sprayed on a soil, a crop or a pest.
